PERFORMING textile solutions

About us

We offer textile solutions for industrial applications, particularly for filtration. We rely on a team of people with more than ten years of experience in the field of technical textiles and textile filter media.

Our organization is extremely lean: we have a network of strategic partners which enables us to combine fast and competitive answers with the highest level of technology, quality and research.

Our range of fabrics is based on our on site experience, innovation driven growth and constant quality control.

We are also able to design and produce custom fabrics "on demand" to satisfy each specific need of our customers.

The manufacture of our ready made products, specifically designed and tailor made, is carried out with the latest laser cutting equipment to grant continuous quality and compliance with the required dimensions.

The final assembly is a fine blend of updated technology and craftsman skills.

Our values

Technical expertise: the deep knowledge of textile technologies and the experience gained on the field in many applications, make Perfabrics team a high level technical partner who is able to understand the most complex needs of customers and offer concrete solutions.

Customer centric: our main objective is to identify and meet the real needs of our customers so that each can receive the best technical and economic solution.

Fast answers: whether it be technical advice, an offer or a delivery, our customers have adequate and timely responses.

Reliability: We take a hands-on, tailored approach to meet our customers needs in order to ensure transparency of conduct.

Stable relationship: Our goal is not to seek random opportunities but to be a point of reference on which customers can always count .

People focused: The heart and soul of every organizational reality is people who belong to it. We think to them when we act. Whether it's customers, suppliers, employees and other partners our behavior is guided by respect for people, by their understanding of the appropriate solution to their needs.

Filtration

Our range of fabrics covers all the main fibers nowadays available on the market of filtration, from cotton to PTFE. The yarn we use, always from prime level international producers, can be either staple or multifilament / monofilament ones and can be combined to better reach the required target.

Our main products for filtration are:

Filter press cloths

- simple
- with barrel neck
- hanging
- with reinforcement
- with coated edges

Cloths for vacuum filters

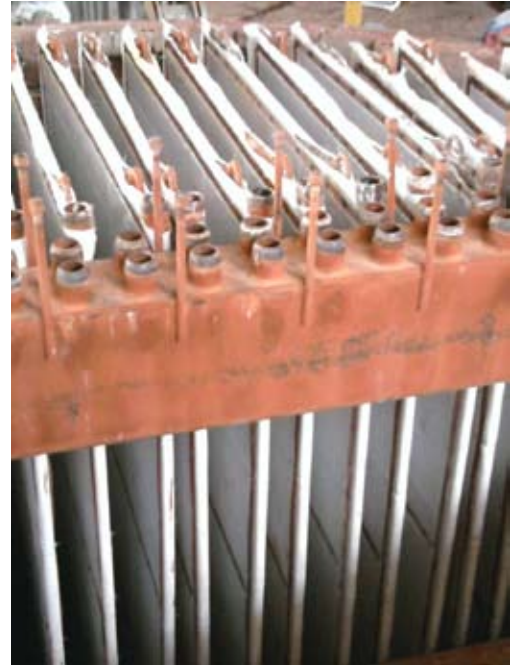

- drum
- disc
- belt
- frame
- pan

Cloths for band filter presses

Bags and cloths for centrifugal machines

Filter bags

Multi pocket bags for fluid bed dryers

Technical fabrics for industrial applications

The fabrics for industrial applications are produced on demand according to the specific needs of the customer. The textile know-how developed in many years of experience is combined with the most updated technologies of production process and components

Auxiliary fabrics for rubber industry

Auxiliary fabrics for textile industry

Fabrics for food industry

Conveyor belts for food industry

Fabrics for silos

Fabrics for aerospace industry

Fabrics for military industry

Fabrics for dry cleaning machines

Fabrics for air conditioning
